~~Example~~ output:

EXPERIMENT – 1

BASIC NETWORKING COMMANDS IN LINUX AND WINDOWS OPERATING SYSTEM.

Aim:

To study & execute basic networking commands in window & linux operating system for viewing network configuration, testing connectivity, checking routine information, monitoring network status & trouble shooting.

CODE:

Open Commands prompts

Commands:

ipconfig

ipconfig /all

ping google.com

tracert google.com

nslookup google.com

route print

netstat

net stat -a

getmac

hostname

arp-a

Open Linux Networking

Commands:

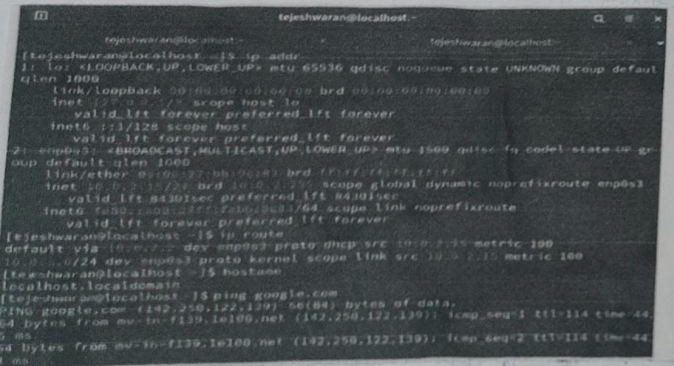

ip addr

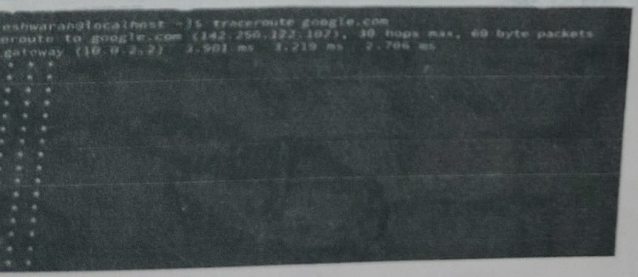

if config

hostname

ping google.com

traceroute google.com

sudo apt install traceroute
nslookup google.com
sudo apt install dnsutils
net stat -a
arp -a
ip link
cat /etc/resource.conf
ip link show
ss -tuan
curl google.com.

RESULT:

Thus the window commands are runned in command prompt & expected output are observed & the linux commands are runned through ubuntu & executed. Output is verified.
