Experiment-7 Develop a Simple Calculator Using XML-RPC

10/04/2026

Aim:

To develop a simple calculator using the XML-RPC (XML) protocol in Python to perform basic arithmetic operations between a client and a server.

Requirements:

Hardware:

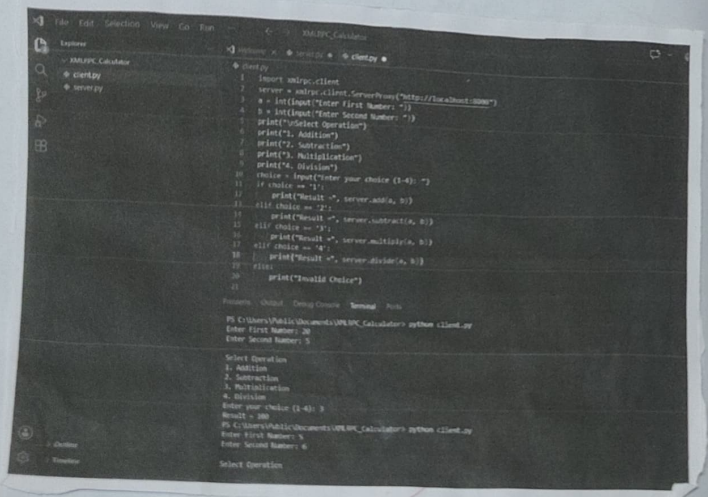

- Laptop
- Minimum 4GB RAM

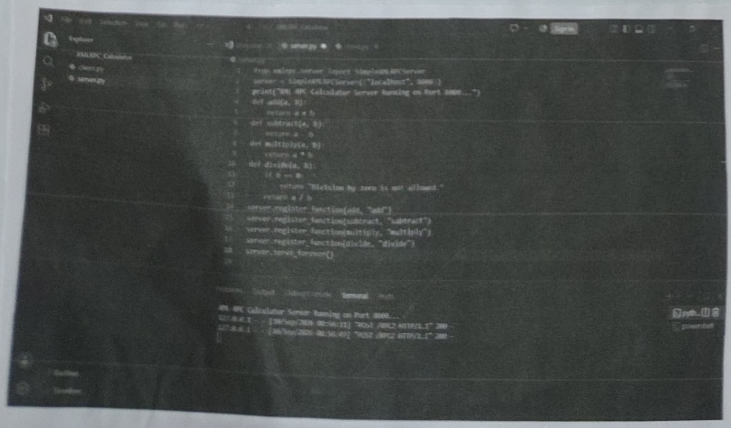

Software:

- Windows 10/11 or Ubuntu Linux
- Python 3.8 or above
- Visual Studio code (vs code) / IDLE

Procedure:

1. Install python.
2. Verify python installation.
3. Create a project folder.
4. Write a server program.
5. Write the client program.
6. Open command prompt / terminal.
7. Navigate to the project folder
8. Start the XML-RPC server.
9. Open another command prompt / terminal.

10. Run the client Program.

11. Enter the input and observe the output.

Enter First Number: 4
Enter second number: 3
Result = 12.

Result:

To develop a simple calculator using XML-RPC is successfully proved.
